

Alejandro Alberto Funes Alvarado

SYSTEMS ENGINEERING STUDENT

SUMMARY

As an enthusiastic student at Gerardo Barrios University, I am looking for opportunities to develop in Tester and QA roles. Although I do not yet have a defined specialty, my passion for technology and my willingness to learn make me an ideal candidate for these roles.

I have a solid understanding of the fundamentals of Computer Systems and Network Engineering, which provides me with a technical foundation to perform effectively in the area of software testing. I am familiar with basic programming and networking concepts, which allows me to deeply understand the systems I am testing.

My methodical approach and attention to detail are qualities that help me accurately identify and document issues in software. Additionally, my teamwork skills and willingness to collaborate with others make me a valuable member of any QA team. I am committed to continuous learning and am willing to acquire new skills and knowledge to improve my capabilities as a Tester and QA.

ACADEMIC DATA

Gerardo Barrios University, Campus Usulután.
computer systems and networks engineering
Cicle VII.

student: active.

As a Computer Network Engineering student in the seventh cycle, my focus is on the area of Quality Control (QA) and testing. Through my basic knowledge, I have gained an understanding of the fundamental principles of software development, but what draws my attention the most is ensuring the quality and reliability of software through rigorous testing and analysis.

Although my experience is still in an early stage, my commitment in the area of QA and testing is constant. From identifying requirements and building test cases to executing control and monitoring, I strive to ensure that the software meets what is required.
